Damage report

I regret to inform you that unfortunately changing the lubricant will not be sufficient.

The machine is worn out. Too seldom cleaned. The piston is pitted. The drive belts torn. Gears and shafts worn out.

The engine needs to be replaced. Completely. May. Be. These are hard times and the news :Sand in the gearbox: far too late.

It is essential to look for alternatives, to replace the defective parts as soon as possible before the whole machine collapses.

A recommendation for the procedure:

First, brake.

Secondly, brake even harder.

Thirdly, standstill.

Now it can start.

First, let the machine room cool down.

Secondly, dismantle the machine into all its individual parts.

Thirdly, correction of the damage report.

These steps will take several years and the damage will be much more intense than expected.

Nevertheless, do not lose courage. You can do it!

Assumption:

Most likely, an initially chaotic, deafening silence will spread due to the stopping of the machine.

Don't let this throw you off your game. This is probably exactly what you and the rest of the world need right now.

After a while, as experience shows, those around you will start desperately looking for something to do to stop the silence.

They will shout out loud. Some will hit notes, others will search for other notes.

They will duly celebrate the futility of action.

Much later, one or the other will make the groundbreaking discovery that

up to now, i.e. since the machine has been in operation, everything has actually gone quite well.

Then Someone E. will delete 'actually' and everything gone quite well.

S. Someone finds the present tense, will delete 'quite' and everything is going well.

Congratulations! You've almost got it.

The important thing now is: Keep your nerve before you lose it.

Now it is time to make a far-reaching decision for further development:

? Get spare parts and get the machine running again ?
And everything starts where everything is finished
Or

? Invent a new machine, build it and get it running ?
And everything lives where everything dies
Or

? Everything is going well ?
And beginning is end and at the end, beginning
Or

.
